

Whole School Provision Map 2026-2027

Our provision mapping reflects the full continuum of support available across the school, including high-quality adaptive teaching, whole-class strategies, guided and small-group work, and targeted interventions. This enables us to identify, address, and remove potential barriers to learning, ensuring that the needs of all pupils are met both within and beyond the classroom environment.

Where a pupil has an identified need within one or more of the four broad areas of need outlined below, a range of interventions and support strategies may be implemented to facilitate their learning, participation, and progress. The examples provided are not exhaustive, and alternative or additional approaches may be considered in response to individual needs, strengths, and circumstances. Provision is reviewed regularly to ensure it remains appropriate, effective, and responsive to each pupil's development.

Quality First Teaching - High quality teaching and differentiation within class

The majority of children achieve well through high quality classroom teaching. Quality First Teaching provides high quality work as part of a broad and rich curriculum that engages children in a range of activities and experiences to develop their skills.

Cognition and Learning

- The school refer to the Surrey Ordinarily Available Provision toolkit to adapt learning and promote inclusion
- Differentiated curriculum planning, activities, delivery and outcome
- Increased use of visual aids and modelling of expected outcomes
- Independent learning promoted
- Learning walls
- Developing feedback through reflection.
- Visual timetables
- Use of writing frames
- Talk for Writing
- Access to laptops
- Targeted adult in class to support on some occasions at group level
- In class support and guidance
- Regular monitoring of lessons and planning by SLT

Speech, Language and Communication

- Adapted learning and differentiated curriculum planning, activities, delivery and outcome e.g. simplified language
- Increased visual aids and modelling
